

Spinning Tunnel and Spinning Pot

Both of the two spinning activities are certified by the TUV upon EN1176 European safety standard. These motion activities are popular for the junior players.

Junior Trampoline and Trampoline Park

The trampoline which consists of multiple jumping beds for maximum fun is constructed with the highest quality materials in every component. It enables player to do a variety of different stunts and motions, just like a gymnast. Train your body in an entertaining way and make your sporting dream a reality. As the first and only supplier in China, Cheer Amusement has both TUV and ASTM certificates for the trampoline park. Materials of this trampoline park have passed all the tests by TUV Rhineland.

Various Plastic Tunnel, junction and Station

Various plastic tunnel, junction and station create lots of fun for players, these are produced by the rotational molding process, could keep the strong strength and solid surface, so that these can last longer with less maintenance.

The plastic powder we use the one from Korea Hyundai, which is non toxic, stronger and lighter.

Quality standard for our plastic products: Grade UL-94, EN71; High quality, smoothly finished, UV protected; TUV tested non-toxic and fire retardant; Used for components including slides, Crawl tubes, activities panels and themed assemblies such as cars, planes.
