

Wave Slides

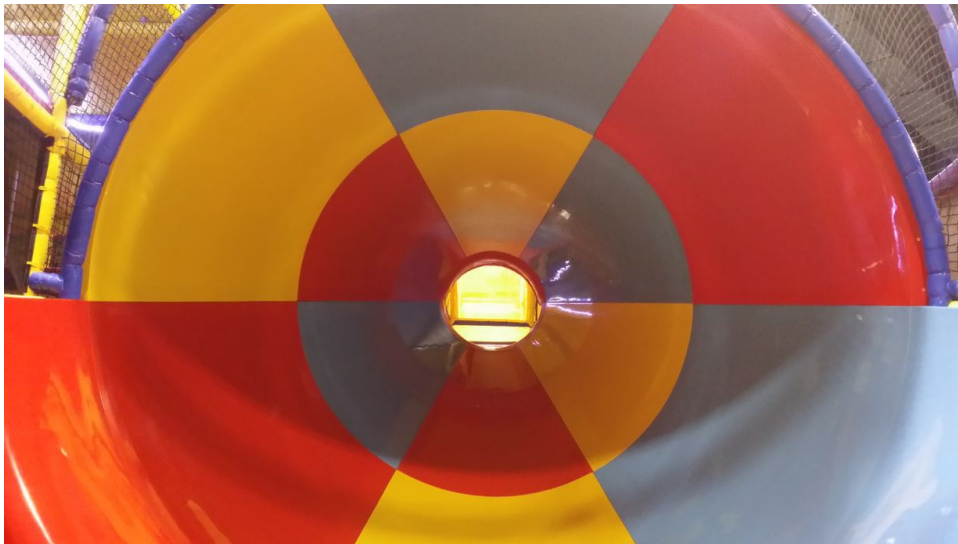

The wave slides are made of thick high-strength fiberglass. Thus our fiberglass slides are solid, stable and durable. Which is certified by TUV upon EN1176-1 & EN1176-3?

Our fiber glass slide is made according to European standard, the surface is special treat and hard to prevent scratch, the material is free of lead. The anti-climb nets with small meshes on both sides along the slide prevent the children from climbing over or slipping off. The 4cm thickness soft padded landing mat on the bottom also protects the players well.

Drum Slide

Drum Slide is new designed play attraction, player can slide down has similar feeling with water park, it bring kids fantastic play experience. The fiber glass used are non toxic and fire retardant.

Spiral Slide and Tube Slide

Our spiral tube slides consist of tubes and transparent domes, the high-strength solid plastic wall and transparent dome material could ensure that players can slide smoothly and safely. The transparent domes also enable players inside visible from outside.

The plastic powder we use the one from Korea Hyundai, which is non toxic, stronger and lighter.

Quality standard for our plastic products: Grade UL-94, EN71; High quality, smoothly finished, UV protected; TUV tested non-toxic and fire retardant.

Roller Slide

The roller slide is approved by TUV upon EN1176, it has colorful rollers and soft padded handrail to make sure kids can slide down excited and safely.
