

Stairs

The surface of our climb ramps and stairs are made by plywood, high density foam and 1000D 0.55mm thickness durable vinyl, which can make sure that the ramps and stairs still remain their original shapes for a long using time and protect the children from injures while they are playing and climbing. We also use double needle sawing process to make the soft activites more durable and can bear the high traffic.

Rainbow Bridges

Our rainbow bridge is colorful, stable and with an excellent arc, Good engineering design and artistic in appearance design. There are various colors used for our rainbow bridges, customers can choose various color combinations as they required.

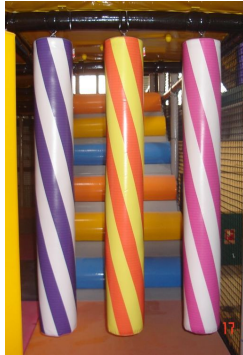

Vertical and Horizontal Rollers

Our rollers are filled with high density foam and wrapped by thick PVC covers which make our rollers elastic and durable.

Punching bags

We have various punching bags with different colors, shapes and patterns. Such as triangle, square, round shaped punch bag with different themeing. our punch bags are filled with high density foam and wrapped with thick PVC vinyl to make it durable and smooth.

Themed Soft Padded Panel, Entrance, Platforms

Our digital printing soft padded panel, entrance and platforms are coated by lamination to protect the printings from fading and falling.

All themed graphics are designed by our professional and experienced designers and manufacture with advanced technology. By controlling the quality standards, our themed elements are good in quality and excellent in appearance. The patterns on the themed elements are 3D digital printings which make the patterns look clear, stereo and real

Spiky Balls

Our spiky ball have a sealed air bag within it, which make the spiky ball soft, light and safe for player.
